PAULINA MADRIGAL BAEZA

IT Service Delivery & Operations | IT Service Management (ITSM) | Industrial Engineer

Toronto, ON | Canadian Permanent Resident | pauli.maba@gmail.com | linkedin.com/in/paulina-mb | paulina-mb.github.io

PROFESSIONAL SUMMARY

IT service delivery and operations professional with 7+ years in enterprise IT services, most of them at a managed IT and telecom services provider serving enterprise and public sector clients across North America, Latin America and Europe. Promoted within 7 months to lead the service delivery team, grew it from 10 to 18 managers across 70+ accounts, raised SLA compliance from 92% to 97%+ and cut recurring incidents by 28%. Asked by the CEO to lead the process engineering function behind the whole service division after consistently bringing improvement opportunities backed by analysis, options and costs; delivered a 30% improvement in operational efficiency. Industrial Engineer (Bachelor's and Master's) with ITIL 4.

CORE COMPETENCIES

IT Service Delivery | IT Operations | Service Desk | Incident, Major Incident & Problem Management | Escalations
ITSM & ITIL 4 | SLA & KPI Management | Service Reviews | Client Success | Vendor Management

Stakeholder Management | Cross-Functional Collaboration | Customer Experience (NPS, CSAT) | BCP/DR
ServiceNow | Jira | Power BI | Tableau | Excel (Advanced) | Basic SQL | Visio | Bizagi (BPMN) | AI Tools

PROFESSIONAL EXPERIENCE

Employer Relations & Workforce Coordinator / Job Developer **Dec 2025 – Present**

Newcomer Women's Services Toronto, Toronto, ON

- Manage a high-volume Ontario employer portfolio of 50–70 contacts per week through cold and warm B2B outreach, prioritizing competing requests across industries.
- Assess employer hiring needs, keep an organized pipeline from first contact to partnership, and coordinate screening, interviews, referrals and candidate matching with internal teams.
- Build employer partnerships with consistent follow-up, deliver workshops and hiring events, and report on outreach and partnership metrics using Excel, Microsoft 365 and AI tools.

GTD Global IT Services | Managed IT & Telecom Services | Santiago, Chile; remote from Toronto, ON since Jul 2022

ITSM Process Improvement Lead / Head of Process Engineering **Jun 2023 – Nov 2025**

- Led the division's process function: 23 people in five teams through 5 direct reports, reporting to the Head of IT Services with regular CEO contact, working remotely from Toronto with teams in Chile.
- Owned the design, governance and continuous improvement of service operations end to end, from sales and implementation to technical support and post-sale, across incident, major incident, problem, change, request and knowledge management.
- Led a modernization of operations and support workflows using Lean Six Sigma tools, delivering a 30% improvement in operational efficiency measured in resolution time and operating cost.
- Set major incident communication standards and defined business continuity and disaster recovery plans.
- Defined ServiceNow workflow, form and reporting improvements from ticket trends and requested them from the platform's administrator, reducing repetitive manual work.
- Built KPI frameworks and Power BI, Tableau and Excel dashboards to track process health and team capacity, reporting monthly to senior leadership.
- Ran the process improvement roadmap for the five teams, turning ticket-trend pain points into improvement initiatives, and reviewed their deliverables daily.
- Led ISO 20000-1 and ISO 27001 recertifications with no major nonconformities, and change management for new processes and tools.
- Led a structured, full-time handover of the function to a successor.

IT Service Delivery & Operations Lead / Senior Service Delivery Manager **May 2020 – Jun 2023**

- Ran day-to-day service delivery for 70+ enterprise accounts across North America, Latin America and Europe, including financial, government and public sector clients.
- Took over a team of 10 service delivery managers and grew it to 18 as clients grew, as hiring manager owning interviews, onboarding, coaching and performance reviews; several team members were promoted.
- Raised SLA compliance from 92% to 97%+, sustained for the final year, through monitoring, governance and follow-up.
- Reduced recurring incidents by 28% through trend analysis, root cause analysis and corrective actions with technical teams.
- Acted as senior escalation point for major incidents, including after hours, coordinating technical teams and vendors through restoration and leading post-incident reviews.
- Managed outsourced providers and vendors, including Microsoft, telecom providers and hardware manufacturers, on SLAs, quality and performance; owned the service delivery budget.
- Ran monthly and quarterly service reviews, NPS and CSAT programs, and client onboarding, migration and implementation projects.

IT Service Delivery Manager **Nov 2019 – May 2020**

- Service owner and primary escalation point for 20+ enterprise accounts, bringing order to incident and follow-up tracking so no ticket was left dormant in the queue.
- Learned first from peers with 10–20 years in the industry, exposing the pain points repeated across portfolios.
- Built, on own initiative, a Power BI dashboard with technicians' feedback that linked each client's contract and SLA to its technical status in 3–4 clicks; it became the team standard and is still in use.
- Cut MTTR by 25% through faster escalation, better initial ticket information, direct coordination with the right technicians and vendors, and active follow-up, with 90%+ client satisfaction.
- Was formally asked to train other managers in these methods, and was promoted within 7 months to lead the team.

Service Delivery Manager & Project Lead **Jan 2018 – Oct 2019**

Clickie, Santiago, Chile

- Managed end-to-end delivery of remote IoT and energy-monitoring services for 4–8 concurrent industrial and commercial clients, as the liaison between clients and technical teams.
- Planned schedules, risks and dependencies from requirements through implementation and follow-up, coordinating engineers, contractors and external partners.
- Analyzed telemetry and built Power BI and Excel reports with basic SQL, and applied Lean Six Sigma tools to improve delivery processes.
